Professional Summary

- 10+ years of experience building scalable, production-grade web applications using **React, TypeScript, JavaScript, Next.js**
- Strong background in **product-based companies**, reusable component architecture, and performance optimisation
- Skilled in **REST API integration**, UI engineering, and frontend architecture
- Experienced in **remote collaboration**, Agile teams, and delivering high-quality UI for global platforms

Experience

Freelance Senior Frontend Developer — Clasify.live, 06/2026 – Present
https://clasify.live/ Remote

- Delivered frontend solutions using **React, Next.js, TypeScript, Tailwind CSS**
- Built responsive, accessible, high-performance UIs
- Developed reusable component libraries and optimised UI performance
- Collaborated with clients to define requirements and deliver features on schedule
- Owned solution design decisions, frontend standards

Senior Frontend Developer — Mercer | Mettl, 10/2017 – 06/2026
https://www.mettl.com Gurgaon, India

- Led frontend development for enterprise-scale assessment platforms
- Built React SPAs using **Zustand** and **Redux**
- Converted Figma designs into reusable, pixel-perfect components
- Integrated REST APIs and managed complex data flows
- Wrote unit and integration tests using Jest
- Familiar with TDD practices for frontend reliability
- Used Lighthouse and PageSpeed Insights to diagnose.
- Improved UI performance and ensured cross-browser compatibilit
- Contributed to CI/CD workflows, version control standards and deployment processes for production releases.
- Provided technical direction and informal leadership to frontend engineers across multiple projects.

- Collaborated with designers, backend engineers, and product managers in Agile teams
- Owned solution design decisions, frontend standards and scalable architecture patterns.

Independent Frontend Developer (React) 2023 – 2024
Projects: RealtyBulls, RealtyBulls Admin Panel, Saissy AI India
Worked independently on multiple production.

- Delivered production-grade React applications for real-estate and AI platforms
- Used Lighthouse and PageSpeed Insights to diagnose and improve frontend performance.
- Built role-based admin panels with modular components
- Integrated frontend with backend APIs
- Developed responsive, performance-focused UIs

UI Developer — Reliable E-Solutions Pvt. Ltd, 09/2015 – 10/2017
https://www.designhill.com/ Gurgaon, India

- Designed and developed multiple web pages from scratch
- Implemented animations and interactive UI elements
- Worked extensively with JavaScript and jQuery

Skills

Frontend: HTML5, CSS3, JavaScript, TypeScript

State Management: Zustand, Redux

Performance: Optimisation, Cross-Browser Compatibility, Lighthouse, PageSpeed Insights, rendering & caching improvements

AI-assisted development: Copilot, code generation tools (validated outputs for accuracy and performance)

Other: Accessibility (WCAG basics), Component Architecture

Frameworks: React, Next.js

Styling: Tailwind CSS, Bootstrap

Testing: Jest, React Testing Library (TDD/BDD awareness)

APIs: REST API Integration, GraphQL

Tools: Git, Figma

Leadership & Highlights

- Ownership of UI architecture and reusable component design
- Strong understanding of frontend best practices and clean code
- Led frontend delivery and guided engineers on architecture, code quality and best practices.
- Conducted code reviews and mentored junior developers
- Experience working on product-scale applications with real users
- Leveraged AI-assisted development tools while reviewing and validating AI-generated code.
